

Luxy Ceiling Lamp

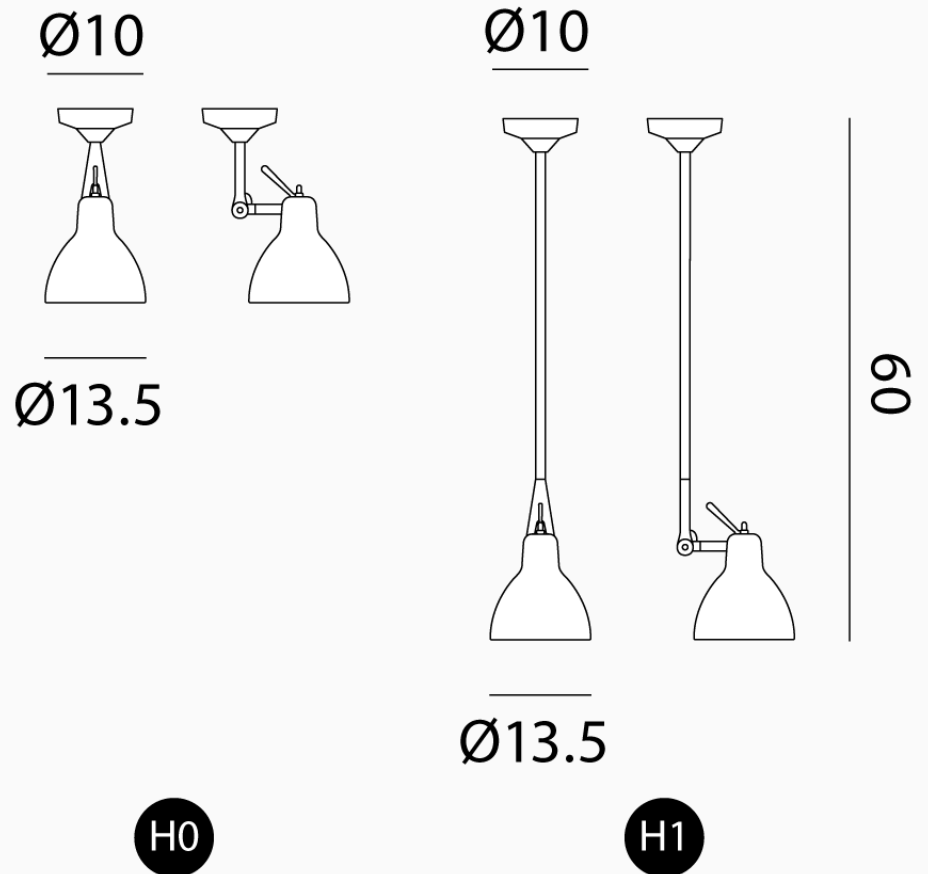

Description

Designed as an evolution of the classic lamp, the Luxy is a standout technical ceiling light. The movement of the pivotal arms are made possible thanks to an invisible mechanism that uses twisted springs. The use of a painted glass diffuser gives both direct and diffused light, with various warm and elegant hues of colours. Available in a variety of sizes and finish combinations. The H0 version is also suitable for wall installation. Made in Italy by Rotaliana.
