

## **Sorella Mono-Bloc Table Lamp**

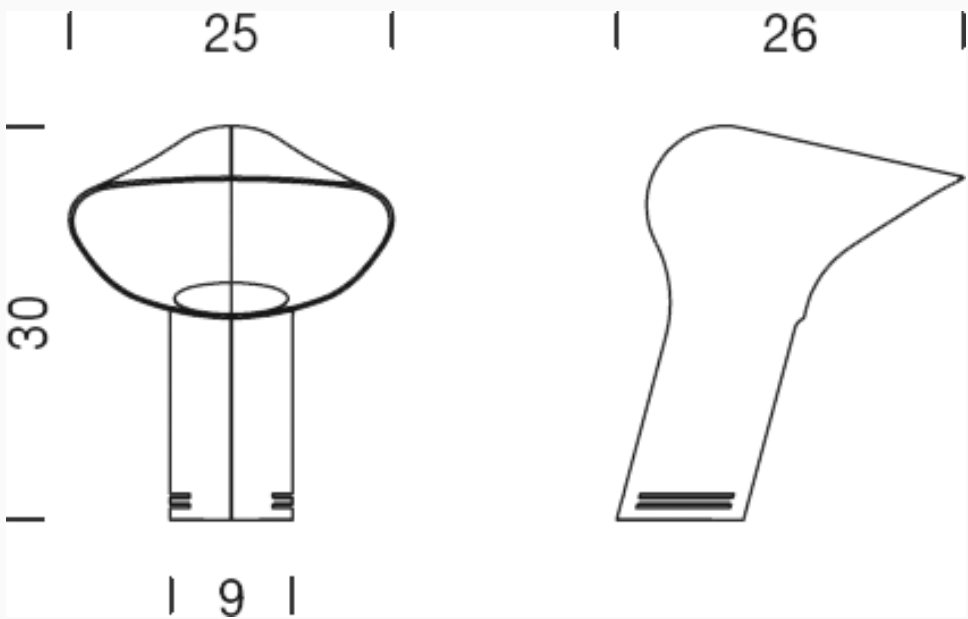

## Description

Originally designed in 1972 by Harvey Guzzini, the Sorella Mono-Bloc Table Lamp has become an iconic design reminiscent of the retro-future chic seen in science fiction films of the era. The Sorella was used as a set piece in a number of productions, including Dr. Goodhead's office and Drax's spaceship in the James Bond film "Moonraker" (1979), and in the Moonbase from the TV series "Space: 1999" (1975-78). Featuring a white polycarbonate body, the Sorella fits in perfectly with retro themed spaces or minimalist contemporary aesthetics. This table lamp takes 1 x E27 Fluorescent, LED or halogen globe. Licensed designer re-issue by NEMO.

## Additional Information
